ANALYSTLAB AFRICA
EXPERIENCE LAB INTERNSHIP PROGRAMME

HEALTHCONNECT CLINIC EXPERIENCE LAB

HIGH-LEVEL PROJECT TIMELINE

Improving Patient Appointment Attendance and Healthcare Support Using Data and AI

Document Control

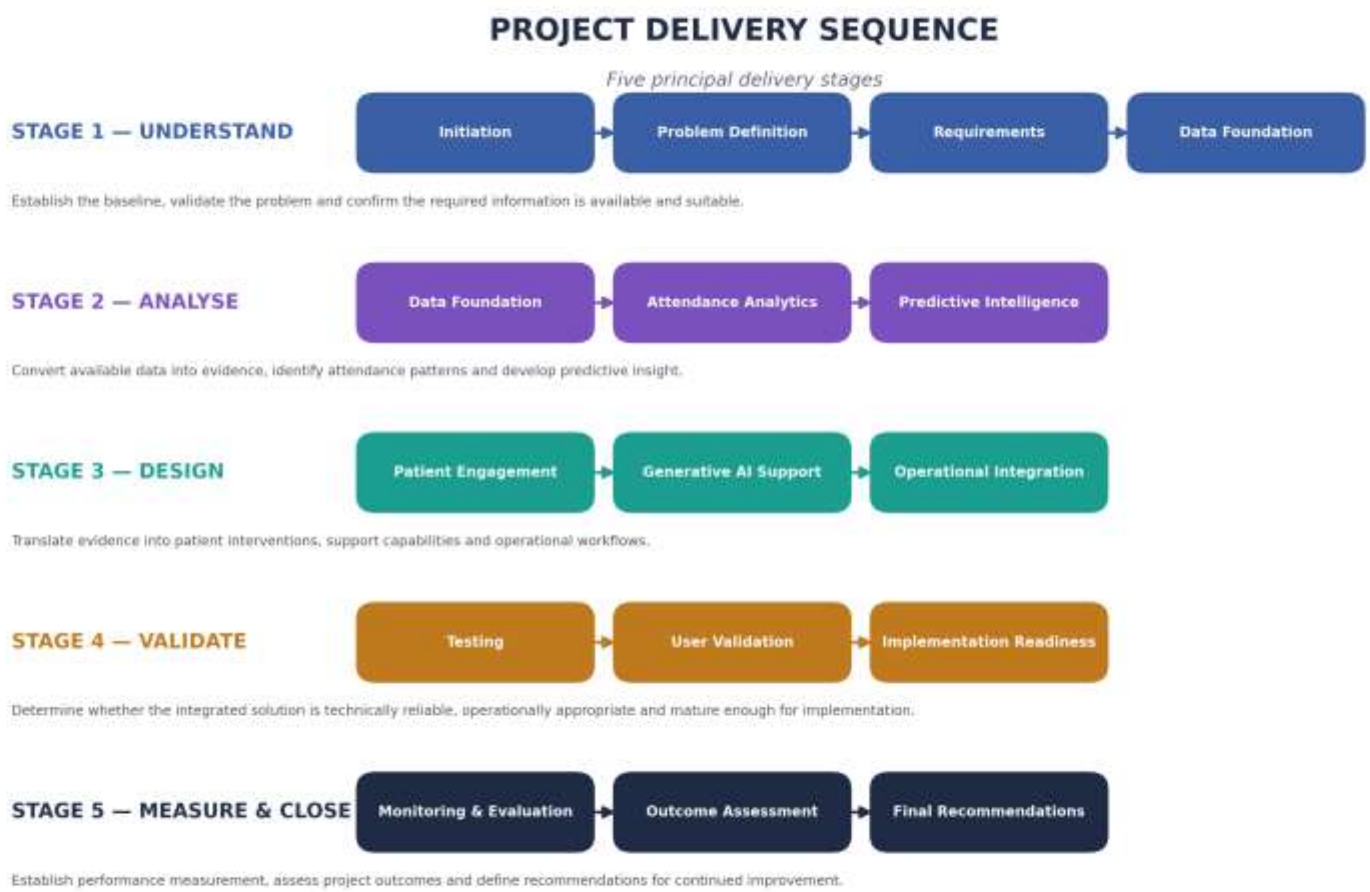
Project	HealthConnect Clinic Experience Lab
Programme	AnalystLab Africa Experience Lab
Document Type	High-Level Project Timeline
Version	1.0
Project Phase	Initiation / Planning
Issue Date	August 2026
Status	Initial Baseline

1. PROJECT DELIVERY ROADMAP

Phase	WBS	Primary Deliverable	Key Decision Gate
1. Project Initiation & Governance	1.1	Project Governance & Control Framework	***G1 — Project Baseline Approval***
2. Problem & Requirements Definition	1.2	Validated Problem & Requirements Specification	***G2 — Problem Validation***
3. Data Foundation	1.3	Analysis-Ready Data Foundation	***G3 — Data Readiness***
4. Appointment Attendance Analytics	1.4	Attendance Analysis & Insights	***G4 — Insight Validation***
5. Predictive Intelligence	1.5	No-Show Prediction Capability	***G5 — Model Readiness***
6. Patient Engagement	1.6	Patient Engagement Intervention Model	***G6 — Intervention Readiness***
7. Generative AI Patient Support	1.7	Generative AI Support Capability	***G7 — AI Readiness***
8. Operational Integration	1.8	Integrated Future-State Workflow	***G8 — Integration Readiness***
9. Testing & Validation	1.9	Testing & Validation Package	***G9 — Solution Acceptance***
10. Implementation Readiness	1.10	Implementation Readiness Assessment	***G10 — Implementation Decision***
11. Monitoring & Evaluation	1.11	Monitoring & Evaluation Framework	***G11 — Measurement Readiness***
12. Project Closure & Recommendations	1.12	Final Project Report & Recommendations	***G12 — Project Closure***

2. DELIVERY SEQUENCE

The project follows five principal delivery stages:



3. HIGH-LEVEL TIMELINE

Phase	Indicative Sequence	Key Outputs	Principal Dependency
1. Initiation & Governance	**Start**	Charter, governance, scope, WBS, controls	*Project authorisation*
2. Problem & Requirements	**Early**	Validated problem and requirements	*Approved project baseline*

Phase	Indicative Sequence	Key Outputs	Principal Dependency
3. Data Foundation	**Early**	Data inventory, quality assessment, prepared dataset	*Data access + requirements*
4. Attendance Analytics	**Early–Mid**	Attendance patterns and analytical insights	*Analysis-ready data*
5. Predictive Intelligence	**Mid**	Evaluated no-show prediction capability	*Validated analytical findings*
6. Patient Engagement	**Mid**	Intervention model and engagement workflow	*Attendance insights*
7. Generative AI Support	**Mid**	AI support capability and controls	*Requirements + approved knowledge*
8. Operational Integration	**Mid–Late**	Integrated future-state workflow	*Solution components*
9. Testing & Validation	**Late**	Tested and validated solution	*Integrated workflow*
10. Implementation Readiness	**Late**	Readiness assessment	*Validation results*
11. Monitoring & Evaluation	**Late**	KPI and monitoring framework	*Defined solution + outcomes*
12. Closure & Recommendations	**End**	Final assessment and recommendations	*Completion of project deliverables*

4. WORKSTREAM OVERLAP

The project will use controlled parallel delivery where dependencies permit.

Workstream	Primary Dependency	May Progress in Parallel With
Problem & Requirements	Project baseline	*Governance*
Data Foundation	Data access + requirements	*Requirements finalisation*
Attendance Analytics	Data readiness	*Engagement planning*
Predictive Intelligence	Analytical findings	*Engagement design*
Patient Engagement	Attendance insights	*Predictive development*
Generative AI Support	Support requirements	*Predictive / Engagement work*
Operational Integration	Defined solution components	*Late-stage solution refinement*
Testing & Validation	Integrated solution	*Final documentation*
Implementation Readiness	Validation results	*Monitoring design*
Monitoring & Evaluation	Defined outcomes and measures	*Implementation planning*

Scheduling principle: activities will be sequenced according to logical dependencies rather than forced into a purely sequential delivery model.

5. KEY PROJECT MILESTONES

ID	Milestone	Acceptance Condition
M01	**Project Baseline Established**	Charter, scope, WBS and governance structure approved
M02	**Problem Validated**	Business problem and requirements confirmed

ID	Milestone	Acceptance Condition
M03	**Data Foundation Ready**	Required data assessed and prepared
M04	**Attendance Insights Established**	Key attendance patterns and contributing factors identified
M05	**Prediction Capability Validated**	Selected predictive approach evaluated against defined criteria
M06	**Intervention Model Established**	Patient engagement logic defined
M07	**AI Support Capability Validated**	GenAI use cases, boundaries and escalation logic validated
M08	**Integrated Workflow Established**	Solution components incorporated into a defined operational workflow
M09	**Solution Validated**	Technical, functional and user validation completed
M10	**Implementation Readiness Assessed**	Technical, operational and governance readiness evaluated
M11	**Measurement Framework Established**	KPIs, baselines and monitoring mechanisms defined
M12	**Project Closed**	Deliverables accepted and final recommendations documented

6. STAGE-GATE CONTROL

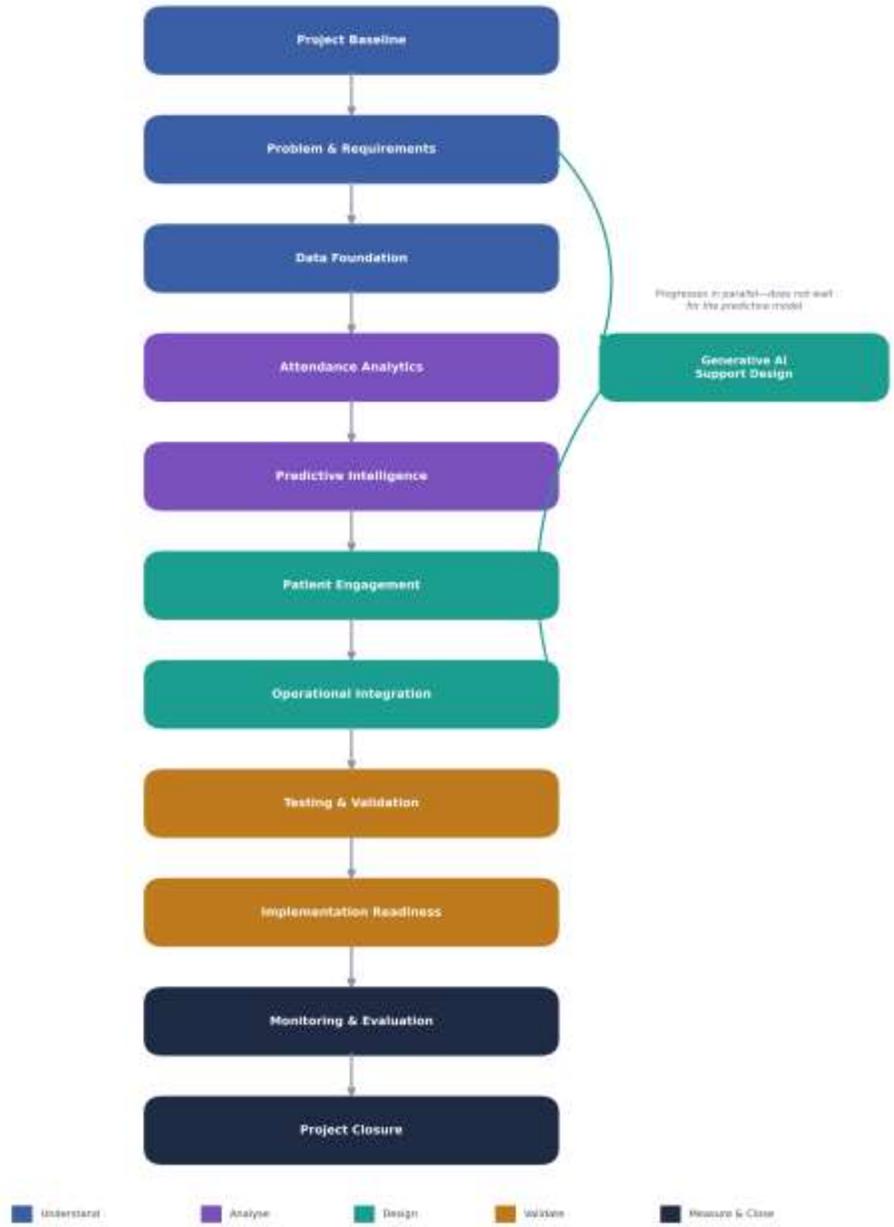
Gate	Decision Point	Required Evidence	Decision
G1	**Project Baseline Approval**	Scope, governance and delivery structure	*Proceed / Rework*
G2	**Problem Validation**	Validated problem and requirements	*Proceed / Rework*
G3	**Data Readiness**	Data availability and quality assessment	*Proceed / Remediate*
G4	**Insight Validation**	Evidence-based analytical findings	*Proceed / Reanalyse*
G5	**Model Readiness**	Evaluated predictive approach	*Proceed / Refine*
G6	**Intervention Readiness**	Defined intervention logic	*Proceed / Refine*
G7	**AI Readiness**	Tested AI capability and controls	*Proceed / Refine*
G8	**Integration Readiness**	Defined integrated workflow	*Proceed / Rework*
G9	**Solution Acceptance**	Validation results and resolved critical defects	*Accept / Remediate*
G10	**Implementation Decision**	Readiness assessment and residual risks	*Proceed / Hold*
G11	**Measurement Readiness**	KPI and monitoring framework	*Approve / Refine*
G12	**Project Closure**	Accepted deliverables and outcome assessment	*Close / Extend*

7. CRITICAL DELIVERY DEPENDENCIES

The primary dependency chain is shown below, with the Generative AI workstream progressing in parallel so it can develop alongside predictive and engagement work rather than waiting for the predictive model.

CRITICAL DELIVERY DEPENDENCIES

Principal dependency chain, with the Generative AI workstream progressing in parallel



8. PROJECT CONTROL MILESTONES

In addition to technical deliverables, Project Management will control five cross-project baselines:

Control Area	Baseline Established	Primary Control
Scope	Project initiation	*Change control*
Schedule	Detailed planning	*Schedule performance*
Risk	Initiation	*Risk monitoring*
Resources	Planning	*Resource allocation*
Performance	Measurement design	*KPI monitoring*

9. TIMELINE GOVERNANCE

The high-level timeline establishes the delivery sequence and control points. The detailed project schedule will convert these phases into executable activities.

The detailed schedule will include:

- Activity ID
- WBS reference
- Activity description
- Responsible owner
- Duration
- Planned start
- Planned finish
- Predecessor
- Dependency type
- Milestone status
- Resource requirement
- Critical-path status
- Float

This maintains traceability:

Charter → Scope → WBS → High-Level Timeline → Detailed Schedule → Execution Control

10. TIMELINE BASELINE

Project	HealthConnect Clinic Experience Lab
Timeline Version	1.0
Baseline Type	High-Level
Planning Basis	WBS 1.0
Scheduling Method	Dependency-driven
Delivery Model	Controlled parallel workstreams
Primary Control Points	Milestones + Stage Gates
Detailed Schedule	To be developed from approved WBS
Schedule Owner	Project Management Function
Review Authority	Project Sponsor / Project Leadership

End of High-Level Project Timeline
